

# JEFFREY T. WINSTON

## PRINCIPAL

In over twenty years of professional practice, Jeff has pursued a special interest in the the planning of communities and regions. He has prepared successful community plans throughout the United States. He has designed plazas, malls and streetscapes and developed design guidelines for public spaces and whole communities. Jeff has also directed numerous projects from conceptual design through construction, often coordinating the work of multiple consultants.

Jeff developed workshop and other participatory design processes including roll-up-the-sleeves charettes, focus group interviews and conflict resolution, which the firm has successfully used in planning and design projects for clients in Colorado, Utah and Wyoming. He has successfully implemented the Institute for Participatory Management and Planning methods for public participation (SDIC).

He has been a visiting professor of landscape architecture, taught at the University of Colorado, key note speaker and published author of multiple papers and articles.
